

BOM Flow

Application Help

Application -> Masters -> BOM Management

Figure 1: BOM Management Menu

BOM Display Mode

Initial window

Right Panel: Items list and Half-finished list group by

- Family
 - o Model
 - Supplier/Factory

Figure 2: BOM Management Initial Window

Double click on item to see the BOM detail.

Grid Tab

In the this tab you can see the BOM for each defined supplier. Only the default supplier is expanded.

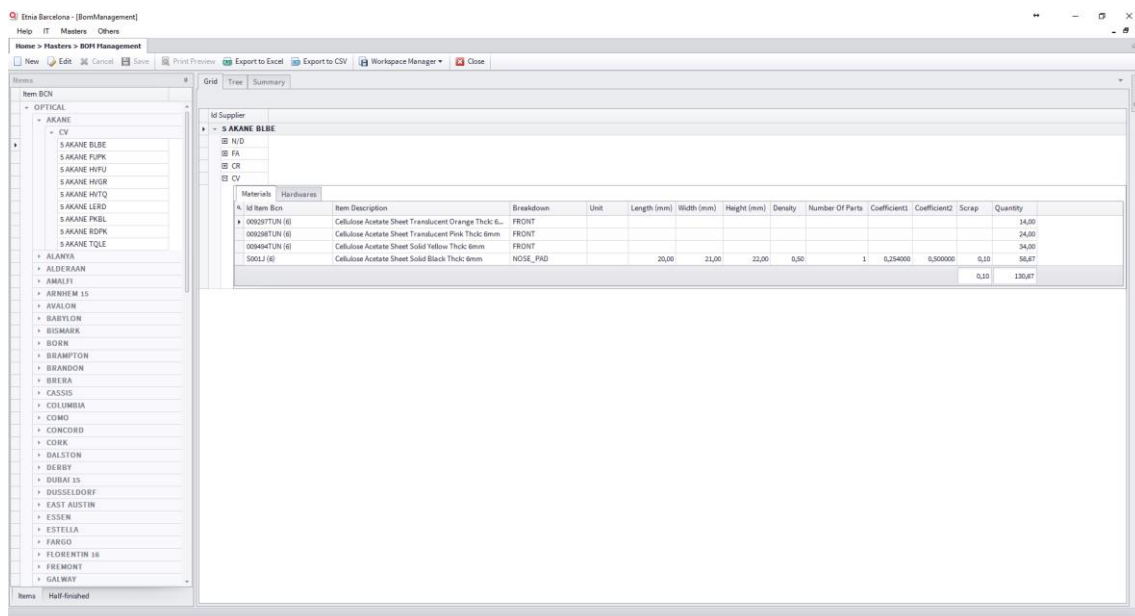

Figure 3: Item BOM main detail tab

Tree Tab

In this tab you can see the tree view.

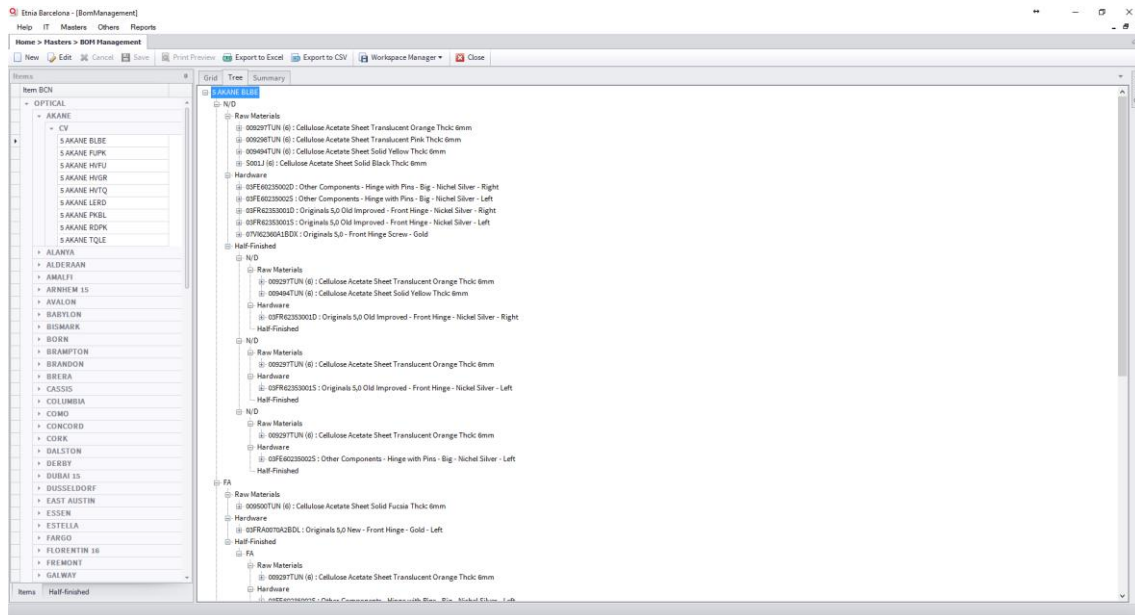

Figure 4: Item BOM tree view tab

Summary Tab

In this tab you can the summary

- Summary by item/supplier
- Summary by unit/supplier

Group	Item	N/D	FA	CR	CV
MT	000297TUN (6)	35,00	0,00	33,00	34,00
MT	000298TUN (6)	23,00	0,00	23,00	24,00
MT	000404TUN (6)	36,00	0,00	34,00	34,00
MT	500211 (6)	36,67	0,00	0,00	36,67
HW	03FE60230002D	3,00	0,00	3,00	3,00
HW	03FE60230002S	4,00	0,00	4,00	4,00
HW	03FR62330001D	10,00	0,00	13,00	5,00
HW	03FR62330001S	5,00	0,00	5,00	5,00
HW	03FR62340018D	2,00	0,00	0,00	2,00

BOM Edit Mode

To edit BOM, click on Edit in toolbar, the left panel will hide and the buttons to add new supplier and copy a BOM for one supplier to another will appear.

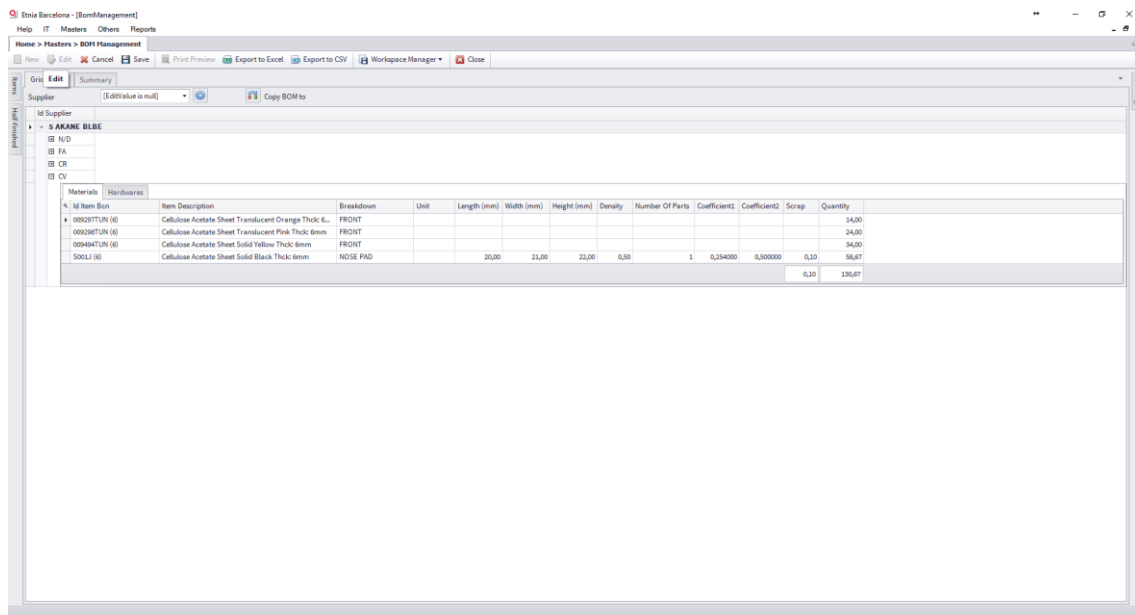

Figure 9: Item BOM edit mode

Add New Supplier

If you want to add a new supplier select one in the list and click on the button, it will appear in the BOM list, but empty.

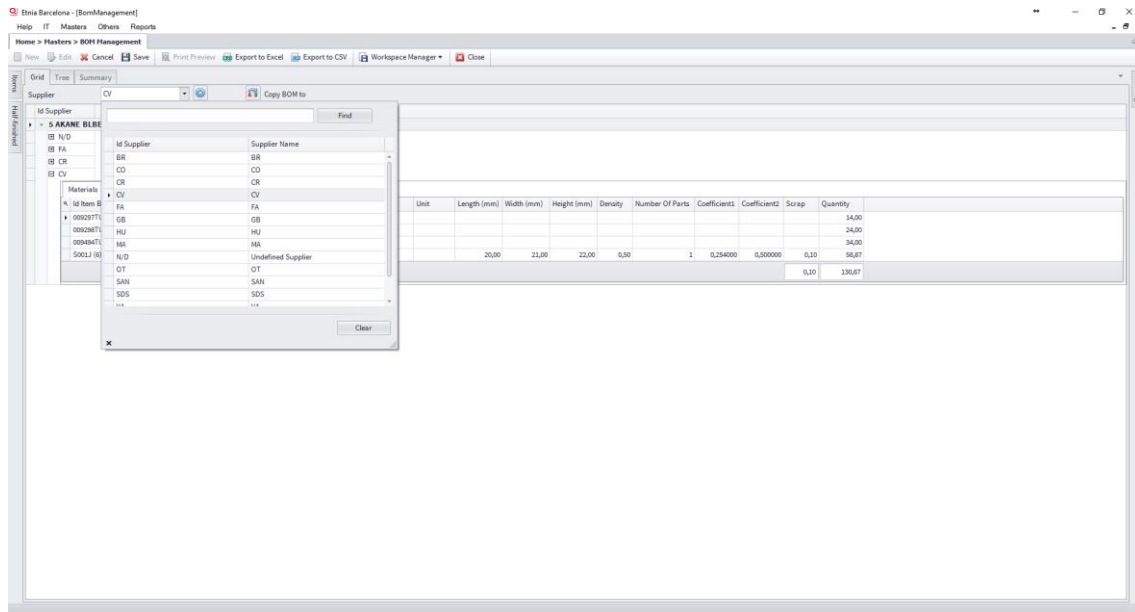

Figure 10: BOM edit, add new supplier

Add Materials, Hardware or Half-finished First Time

If you want to add Materials, Hardware or Half-finished for the first time, right click over the supplier name and select one in the list options.

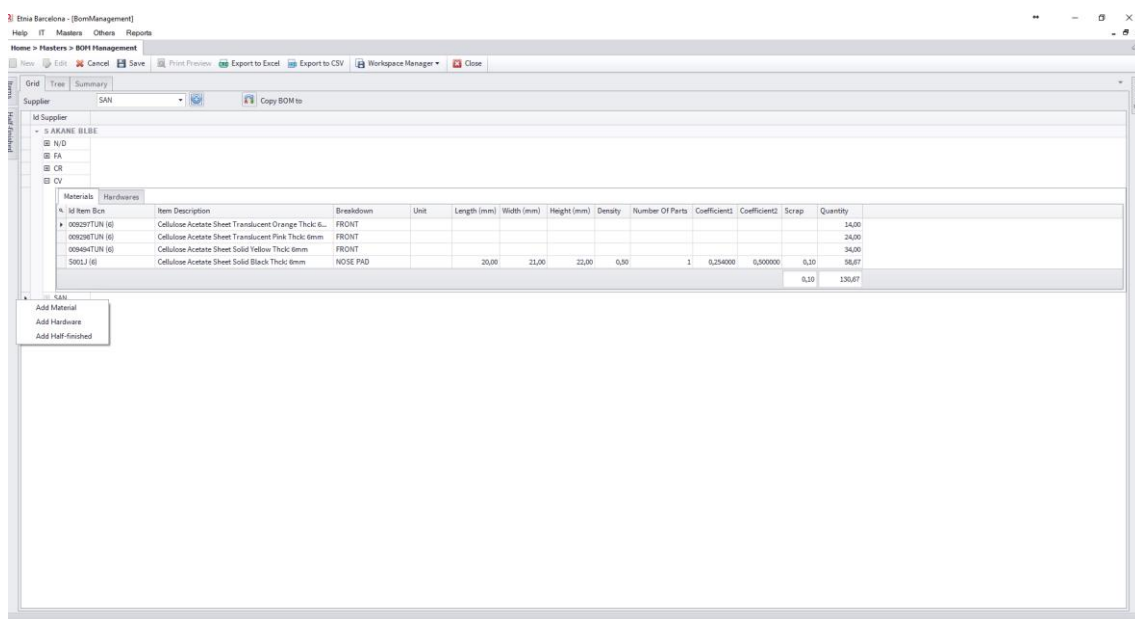

Figure 11: Edit BOM, add Material/Hardware/Half-finished first time

Edit Materials

You can select a material and a breakdown from the list. For quantity, there are two options, you can fill the fields "Length", "Width", "Height", "Density", "Number of parts", "Coefficient 1",

“Coefficient 2”, “Scrap” and the application calculate the Quantity or you can fill directly the quantity, but you can’t indicate any other value. At the end, press Enter for a new line.

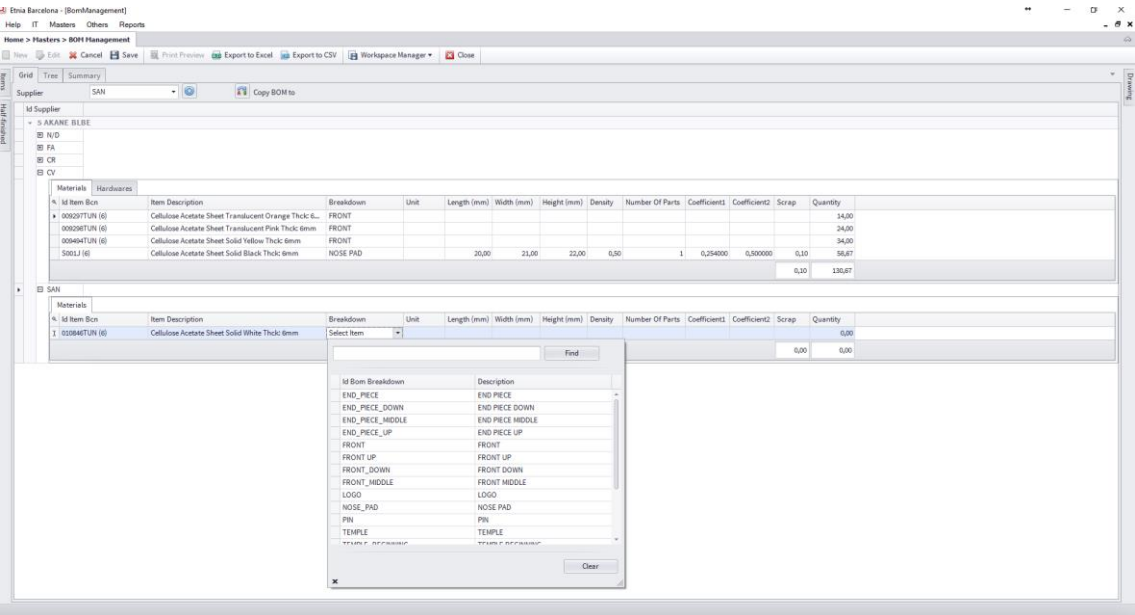

Figure 13: Edit material, select material breakdown

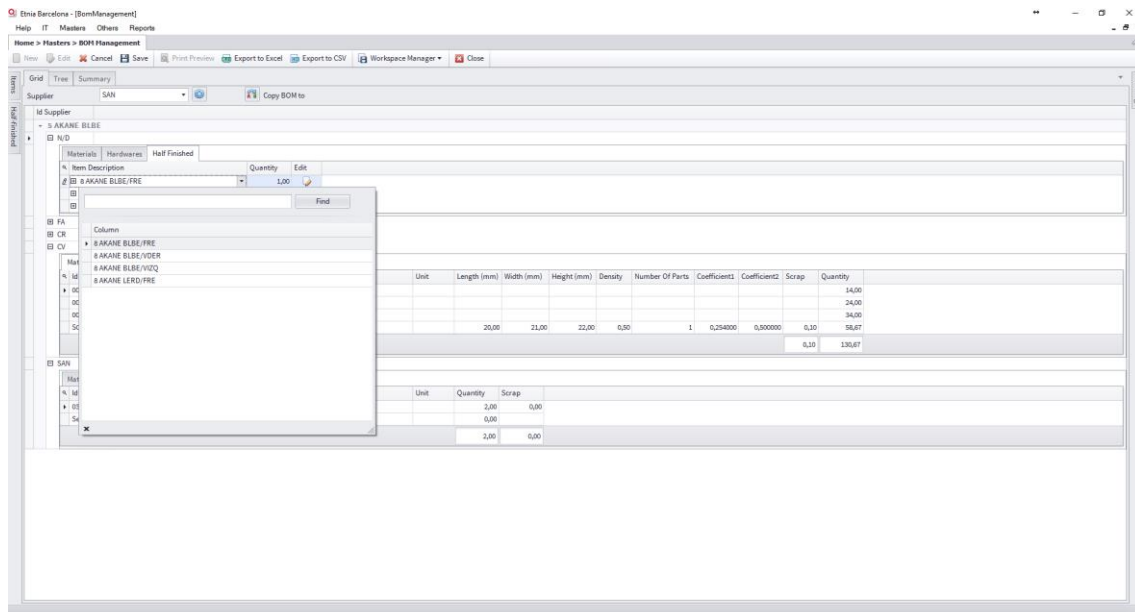

Figure 16: Edit half-finished

Copy supplier BOM to another supplier

It is possible to copy one supplier BOM to another supplier. If you click to “Copy BOM to”, you can select the supplier BOM source and the destination or destinations.

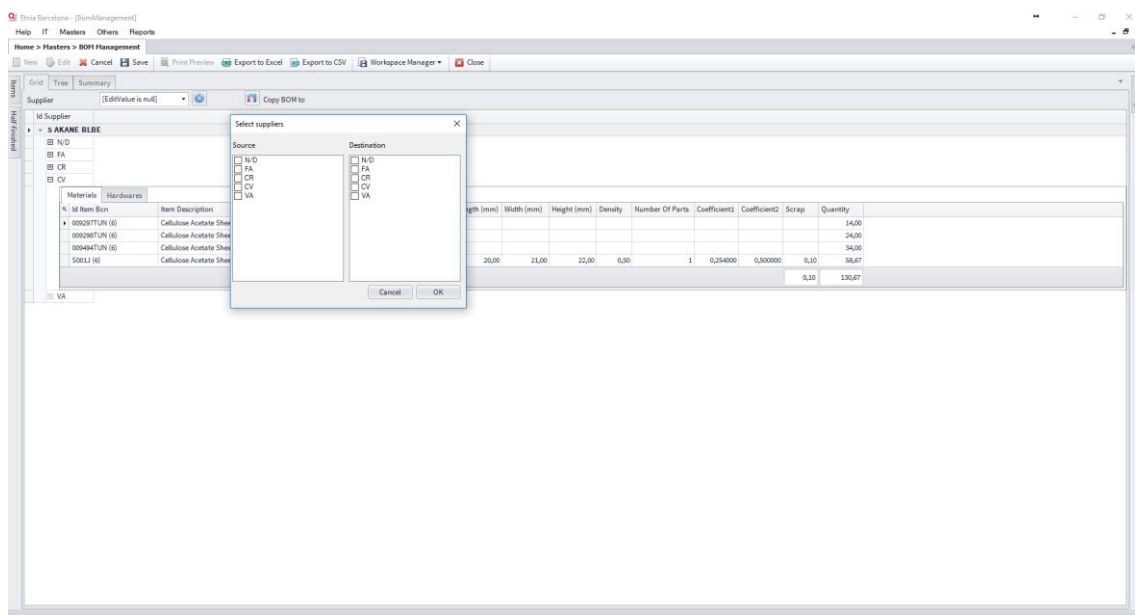

Figure 17: Copy BOM to

This action will delete all the destination supplier BOM and copy the BOM source, with the following considerations:

- Materials: Copy all data directly.
- Hardware: Copy all data directly.

- Half-finished: Search if exist a BOM for this half-finished (source) and supplier (destination), if exist it will be copied to destination, if not a warning message will be displayed.

In this example we are trying to copy “N/D” BOM to “SDS” BOM, but SDS hasn’t a BOM defined for these 3 half-finished.

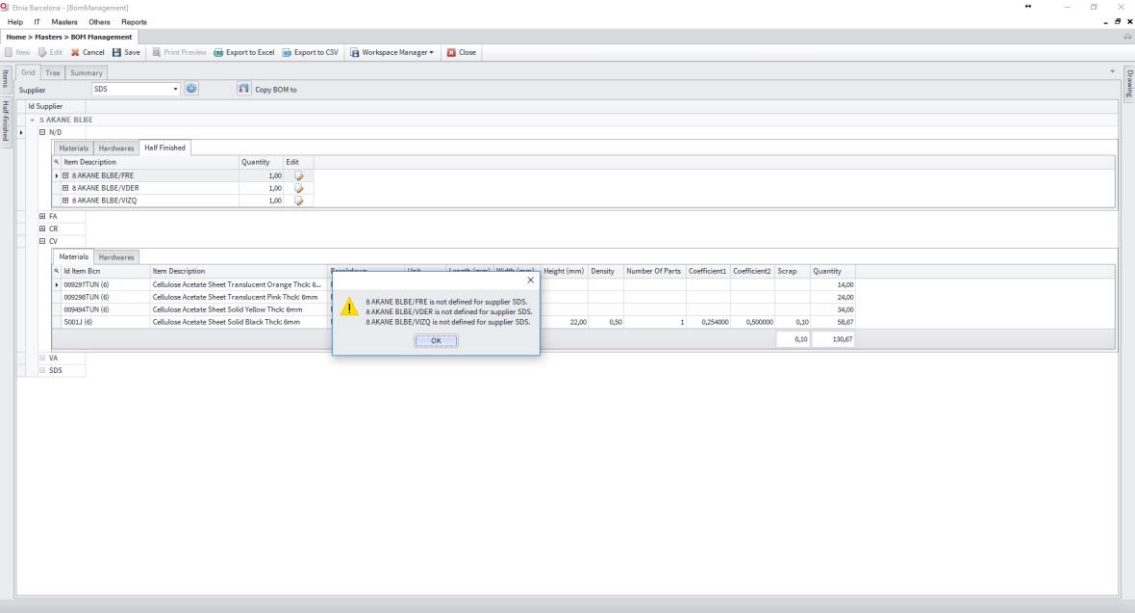

Figure 18: Copy BOM, warning message
